

# Applying Scaled Portfolio Kanban

A Professional Kanban training course created by ProKanban.org and the Professional Kanban Trainer Community.

The ProKanban.org mission is to support all Kanban practitioners (new or old) by providing a safe and inclusive forum to learn about Kanban.

“ ASPK is a course that helped me understand how to forge my own path towards scaling Agile in my organization. ”

“What are our teams working on?” “How well does our execution match up with our stated strategy” “Are we as an organization efficient, effective and predictable?” Leaders across most organizations want to know the answers to these questions.

This workshop is for anyone who has asked these questions or wants to help the organization find the answer to these questions. This class will help you set up a Kanban system that helps your organization continuously inspect and adapt the value delivery process. You will gain greater visibility into what team(s) across the organization are working on and what is in the way of getting value delivered.

ASPK is the only Agile Scaling class in the industry that will teach you not only how to simply scale Kanban but also provide the tools to help Scaled Kanban work in your context.

## Learning Outcomes

After the course, learners will be able to:

- Set up systems that provide transparency into what teams are working on
- Evaluate if the current work maps to the overall stated strategy
- Quickly understand the reasons that are preventing work from making progress
- Validate if the organization is being effective by delivering the right things

## Topics

- Designing a Portfolio Kanban Board
- Understanding how to effectively operate the Portfolio Kanban system
- Reconciling active work with stated strategy
- Visualizing, managing, and removing dependencies as well as blockers to work
- Forecasting completion dates for items across the Portfolio
- Improving the performance of the entire organization by leveraging data

50+ Trainers

15+ Countries

Live & Virtual

## Who should attend?

The Applying Scaled Portfolio Kanban course is for anyone looking to bring the benefits of Kanban to every level of the organization. If you are looking to influence your organization to be more efficient, effective, and predictable, this course will provide you the tools to achieve those goals.

## Validated Learning

After taking the course, you will have an opportunity to validate that you understand scaling Kanban topics. We will invite you to take an online assessment that evaluates your understanding and provides you with guidance on areas to improve.
